Organic shapes are irregular and imperfect. Naturally these shapes will all be slightly different from one another. They are often curved and flowing and can seem unpredictable. Using organic shapes can make a piece of art or design seem more natural and real.

EARTH WIND & FIRE 1969

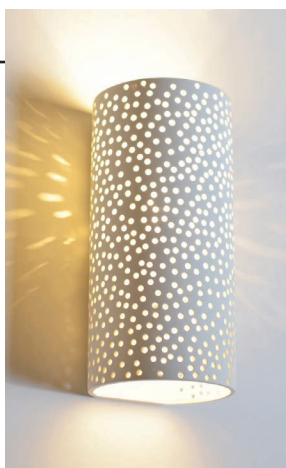

**GYP**SUM, IS AN **EARTH** SOFT SULFATE MINERAL COMPOSED OF CALCIUM SULFATE DIHYDRATE. IT IS MINED AROUND THE GLOBE, WITH MANY USES INCLUDING AS A FERTILIZER, CONSTRUCTION MATERIAL, IN ARCHITECTURAL AND SCULPTURE APPLICATIONS AS WELL AS PHARMACEUTICAL AND FOOD ADDITIVE USES

**CLAY** IS A VERY FINE-GRAINED **EARTH** MATERIAL THAT DEVELOPS PLASTICITY WHEN WET, BUT BECOMES HARD, BRITTLE AND NON-PLASTIC UPON DRYING OR FIRING. IT IS A VERY COMMON MATERIAL, AND IS THE OLDEST KNOWN CERAMIC. PREHISTORIC HUMANS DISCOVERED THE USEFUL PROPERTIES OF CLAY AND USED IT FOR MAKING POTTERY.

**PORTLAND CEMENT** CONSISTS ESSENTIALLY OF COMPOUNDS OF LIME (CALCIUM OXIDE, **CaO**) MIXED WITH SILICA (SILICON DIOXIDE, **SiO<sub>2</sub>**) AND ALUMINA (ALUMINUM OXIDE, **Al<sub>2</sub>O<sub>3</sub>**)

# tailor

1. (of clothes) made by a tailor for a particular customer. "tailor-made suits"

2. made, adapted, or suited for a particular purpose or person. "he was tailor-made for the job"

noun

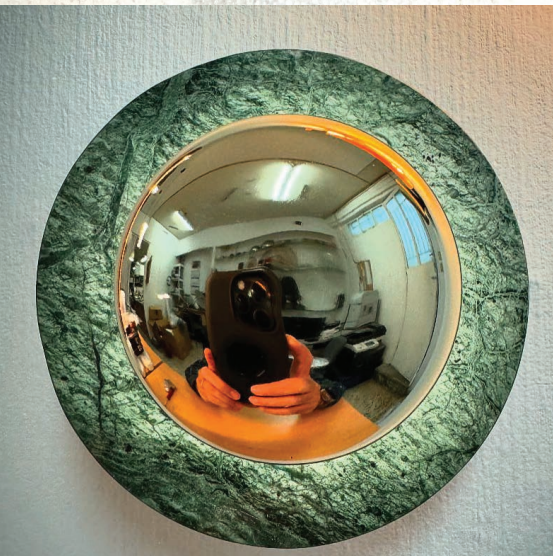

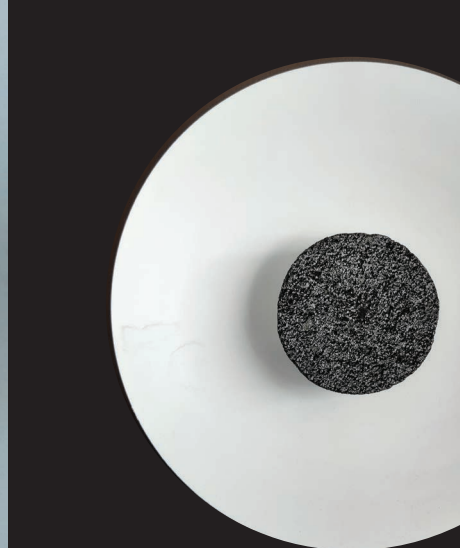

a garment that has been specially made for a particular customer.

"a lady in a red tailor-made"

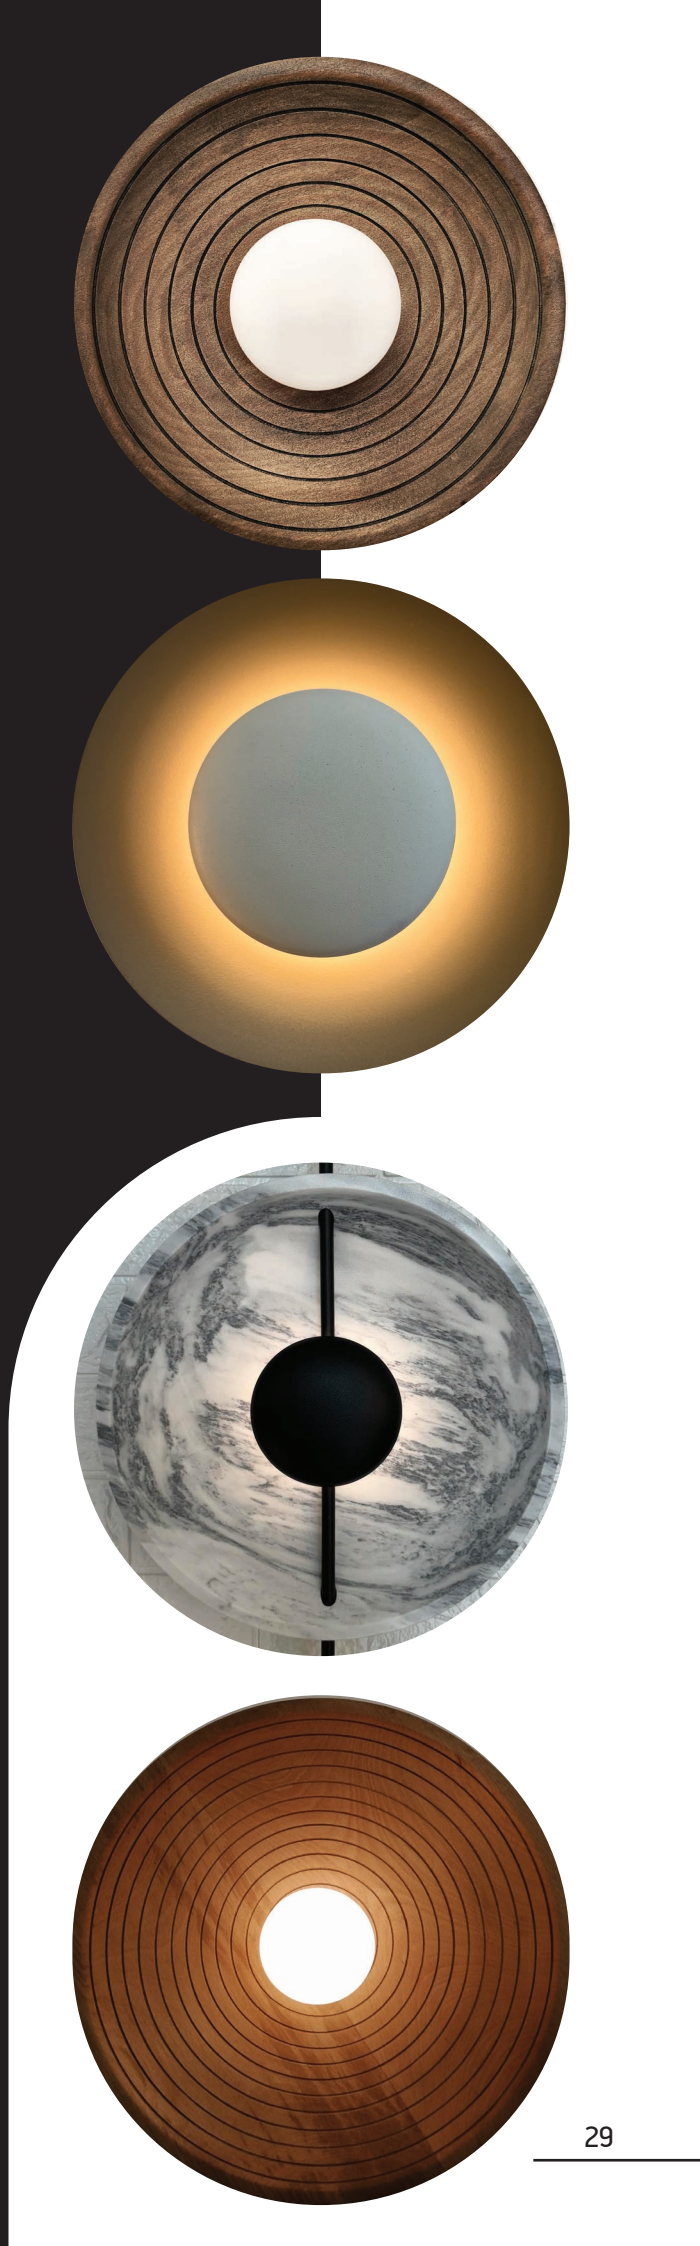

# made.

Boho design is a free-spirited approach to interior decorating — a style that fully embraces playful colors, textures, and patterns, embodies individual expression, and encourages “thoughtful maximalism” through the careful curation and layering of multicultural artwork, textiles, and decorative objects

Is this the real life? Is this just fantasy?  
Caught in a landslide, no escape from reality

Scandinavian design is a design movement characterized by simplicity, minimalism and functionality that emerged in the early 20th century, and subsequently flourished in the 1950s throughout the five Nordic countries: Denmark, Finland, Norway, Sweden, and Iceland. A reflection of minimalism, this trend looks to reduce forms and colours to their simplest states, to create airy, bright, and elegant spaces. The colour palette comprises light and soft natural shades such as cold and warm greys softened by aquas and nude tones.

Pendant lighting is a great way to add that little something extra to your space. It's not only functional but it can also be used as an accent or task light for those hard-to-reach spots! Plus, pendants are a great way to take up less floor space and offer easy installation options.

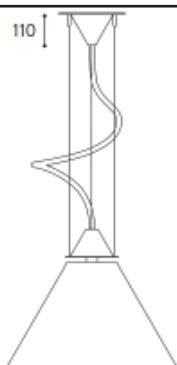

#### Historical Background for Hanging Lights

Ancient Romans and medieval Europeans used simply putting hanging lamps in their grand halls and castles. Over time, those functional portions evolved into the ornamental pendant lamps we see these days, to be had in various designs and patterns.

### **Sand soda lime**

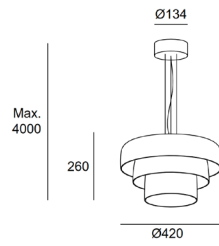

Glass has always been found in nature, but the first glass created by humans can be dated to about 4,000 years ago, when craftsmen working in Mesopotamia, the land between the Tigris and Euphrates Rivers, discovered the art of mixing sand, soda, and lime to make glass.

It's characterised by simplicity, clean lines, and a monochromatic palette with colour used as an accent. It usually combines an open floor plan, lots of light, and functional furniture, and it focuses on the shape, colour and texture of just a handful of essential elements. Minimalist style is all about less is more, highlighting uncomplicated forms, clean lines and simple finishes. Inspired by Japanese design, minimalist style echoes a contemporary feel with plenty of open space.

The dining table plays a special role in any home, regardless of whether it is situated in the kitchen, open plan layout or separate room. It is where we share the precious ritual of sitting down to eat with family members on a day-to-day basis and the venue for convivial meals with guests. Whatever the occasion, to optimise the experience, the right lighting is crucial because it needs to fulfil different functions such as creating a welcoming or romantic atmosphere, depending on the situation, while ensuring you have adequate visibility to carve meat, serve and see what is on your plate. And of course, the light fitting itself can be an important decorative element.

The fan is designed to produce a pressure difference, and hence force, to cause a flow through the fan. Factors which determine the performance of the fan include the number and shape of the blades. Fans have many applications including in wind tunnels and cooling towers.

Fun fact

Between 1882 and 1886 Schuyler Wheeler invented a fan powered by electricity.
